Coerver Skills Camp:

This camp is designed to improve each player's individual skills and confidence on the ball. Each child will receive age-appropriate instruction on the fundamental skills of soccer following the Coerver Coaching's Pyramid for Player Development. Emphasis is on speed of play, weight, timing and accuracy of passing. Advanced moves are introduced including when and where to use them. The program develops combination play, small group play and fast break attack with emphasis on transition play. The players are put into situations which require decision making both with and without the ball and they are encouraged to play freely and be creative.
